Shaohan (Han) Wang

U.S. Permanent Resident

sw2265@cornell.edu 2918 41st Ave APT 19A, Long Island City, NY, 11101 cell: (814) 880-5578

EDUCATION

Cornell University, College of Engineering, New York, NY
Master of Engineering in Financial Engineering, **GPA: 3.825** **December 2021**

Pennsylvania State University, State College, PA
Bachelor of Science in Mathematics (Systems Analysis) & Bachelor of Science in Economics, **GPA: 3.76** **May 2020**
Honors: Dean's List (for 6 semesters)

Selected Coursework: Monte Carlo Simulation, Derivatives Securities, Fixed Income Securities, Optimization Modeling in Finance, Quantitative Trading Strategies, Data Mining and Machine Learning, Statistics for Financial Engineering, Big Data Technologies, Linear Algebra, Introduction to Econometrics

EXPERIENCE

Strategy & Transactions - Quantitative Finance and Economics Senior, *Ernst & Young LLP,* New York, NY **Mar. 2022-Present**

- Providing valuation consulting services for non-audit clients and valuation review support for audit clients, assisting them in meeting financial reporting requirements or resolving tax issues.
- Valuing complex financial instruments associated with the M&A deals such as contingent considerations, preferred and common stock in privately held companies, management incentive plans/options, convertible bonds, municipal and corporate bonds, warrants and other contingent assets and liabilities.
- Participating in firm-wide existing Excel/MATLAB based convertible bond models enhancement and transition into python to improve the model performance and efficiency.
- Honored with the "EY-Parthenon Vice Chair Award" (Spring and Fall 2025) in recognition of practice-building impact during busy seasons. Organized multiple office event series strengthening internal connections and team resilience; sole representative of the QFE team on the NYC office Culture Committee in fiscal year 2025 and 2026.

Intern Quantitative Researcher (remote), *Axiomquant Investment Management,* Beijing, China **June 2021-Aug. 2021**

- Independently developed a pricing model of the trading convertible bonds in Chinese market by applying Monte Carlo simulation and Least Square Monte Carlo approach to capture the embedded American option feature using Python.
- Generated the stock price sample path by applying Geometric Brownian motion with jumps and tested the developed pricing model performance with Black-Scholes formula and output visualization graphics using machine learning techniques.

Investment Banking Intern Analyst, *Ferghana Partners Group,* New York, NY **June 2018-Aug. 2018**

- Performed analysis on healthcare industry company financial positions by building simple linear regression models in Excel based on the information from the financial statements.
- Organized recent deal information of healthcare industry companies in China and the U.S.; created visualization for the profiles with financial information and product descriptions for further analysis.

PROJECTS

Forecasting Drug Revenue using Alternative Data, *Jefferies Group LLC,* New York, NY **Sep. 2021-Dec. 2021**

- Explored the alternative datasets and extracted the potential features by data wrangling and feature engineering techniques.
- Applied both unsupervised and supervised Machine Learning models, including K-Means Clustering and XGBoost, to predict the trend and period of future drug revenue ramps using Python and R.

Portfolio Optimization with Momentum Factor, *Cornell University,* Ithaca, NY **Apr. 2021-May 2021**

- Applied fundamental factor model along with momentum effect to estimate the asset return values at each sample time point using Python.
- Performed the portfolio optimization with optimal portfolio weight for each individual asset and constructed the optimal portfolio by applying traditional Markowitz optimization setup.

Assistant for Research Economist (remote, part time), *Massachusetts Institute of Technology,* Cambridge, MA **Sep. 2019-Oct. 2019**

- Researched development of the Capital Asset Pricing Model; evaluated and optimized portfolios using Python.

SKILLS & INTERESTS

Technical: Python, R, Excel VBA, MATLAB, Git/GitHub, Linux System, Stata, Mathematica, Microsoft Office
Interests: College Guitar Club; writing songs; piano; tennis
